

Fellow EIC

Larry Seeley - nominated by the Canadian Society for Chemical Engineering

Larry Seeley has established himself as a successful business executive, innovative engineer and determined research leader. He founded and served as President and CEO of Recapture Metals Limited, and was also President and CEO of Lakefield Research Ltd. growing the company to over 1,000 employees with laboratories and pilot plants in Canada and around the world. He also spent 25 years with Falconbridge Ltd. as Corporate Vice-President of Environmental Services and in other senior roles in operations and technology.

En plus de ses fonctions de professeur, Larry Seely a fait beaucoup de travail bénévole pour appuyer nombre de maisons d'enseignement, comme Cambrian College, Science Nord, l'Université Trent, UOIT, l'Université de Toronto et l'Université Queen's. Il est président de la Société canadienne de génie chimique et il est un ancien président de la Société canadienne de métallurgie.

Through this impressive record of achievement, Larry Seeley has consistently demonstrated good business practices as well as a dedication to good engineering principles.

Ladies & gentlemen and Mr. President, please welcome Larry Seeley as a Fellow of the Engineering Institute of Canada.
